Student A

- 1 Read the text. Ask questions to complete the missing information in text A.

When did something happen in the New Mexico desert?

- 2 Answer Student B's questions about text B.

Text A

The Roswell Incident

On (1)... (when?), something happened in the New Mexico desert. In the beginning, something crashed (2)... (where?) near the city of Roswell. The government said (3)... (what?) but many people didn't believe them. Stories started that it was an alien spaceship! But then, everyone forgot all about it. However, people started writing and talking about Roswell again (4)... (when?). They had a lot of questions. There were theories that the US government discovered (5)... (what?) in Roswell and then kept the information secret. In 1995 there seemed to be new evidence: a video showing (6)... (who?)! But is it true?

Text B

It's raining frogs

When it rains a lot in Britain, people say 'it's raining cats and dog'. But sometimes, very strange things do fall from the sky. For example, on the 16th June 1939, Mr Ettles was walking home when it started to rain a lot. Suddenly, he heard a very strange sound. He was amazed to see that it was raining frogs! Hundreds of small frogs were falling from the sky! This is one of many reports of raining animals. How can this happen? One theory is that strong winds can pick up animals when they travel over rivers or ponds. It carries the frogs and then drops them several miles away. But no one has seen this happen in real life!

What do people say when it rains a lot in Britain?

Text A: The Roswell Incident

On the morning of the 7th July 1947, something happened in the New Mexico desert. In the beginning, something crashed on a farm near the city of Roswell. The government said it was a weather balloon but many people didn't believe them. Stories started that it was an alien spaceship! But then, everyone forgot all about it. However, people started writing and talking about Roswell again in the 1970s. They had a lot of questions. There were theories that the US government discovered alien bodies in Roswell and then kept the information secret. In 1995 there seemed to be new evidence: a video showing scientists with victims of the accident! But is it true?
